Taxonomy

Challenge

What makes them so different?

The ability to classify animals and plants into specific groups is an important skill required when completing any studies in ecology. Stand in the Reef HQ Tunnel. Look both sides of you.

In the table below list the common names, phyla (add class if required) and distinguishing features of as many different animals and plants as you can. Your major challenge is to find examples from different phyla.

Common Name	Phylum	Class	Distinguishing Features
