

# Challenge Activities

## Cyclones & Human Activities

### Challenge

Discover their major impacts?

Coral reefs can be damaged by the forces of nature and by humans. Investigate the impacts cyclones have on coral reefs in the Water Gallery.

How are cyclones caused?

What are the major impacts of cyclones?

---

---

---

---

How often do these events occur?

Does the reef recover after cyclones?

---

---

---

---

Observe the reef scape in the Tunnel Window. This coral reef could potentially be damaged by human activity.

In the table below list the human activities that occur on land and out in the ocean that damage coral reefs.

On the Land		Out in the ocean	
1.		1.	
2.		2.	
3.		3.	
4.		4.	
5.		5.	

What best environmental practices could be implemented to minimise damage to coral reefs?
